Cambium Networks™

ePMP | ePMP Software

ePMP Software is the foundation of Cambium Networks ePMP 1000 platform. It enables operators to efficiently strengthen and manage the performance of their networks with eFortify™ and eCommand™.
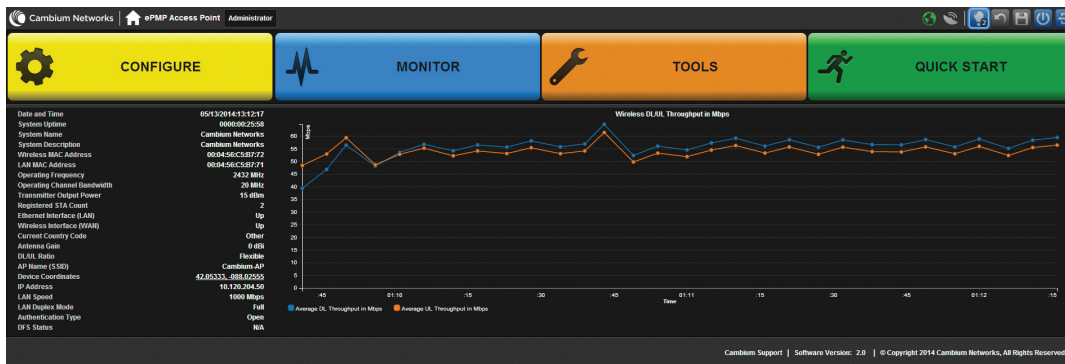

eFORTIFY™ *Recognize and React*

Enhances the performance of ePMP 1000 devices in high noise environments

» *GPS Sync (Synchronization)*

» *Adaptive Scheduler*

» *Smart Rate Adapt Algorithm*

eCOMMAND™ *Plan, Provision and Monitor*

Provides a suite of management tools to plan, provision and monitor the network

» *eDetect™ Interference Detection Tool*

» *Capacity Planner*

» *Spectrum Analyzer*

» *CNS (Network Management Tool)*

» *Enhanced Performance Monitoring*

Home Page

eDetect

eDETECT™ With one click, quickly view a snap shot of the environment around each node to access network health and interference. A green, yellow, red color code visually indicates the interference impact on the network.
